What is OpenType?

OpenType is a cross-platform font format developed by Adobe and Microsoft. It has a potential to provide advanced typographic features such as multilingual character sets, ligatures, small capitals, various numeral styles, and contextual substitutions.

OpenType, as the new industry standard, supports Unicode, which enables the fonts to contain a large number of characters. While PostScript fonts are technically limited to a maximum of only 256 characters, OpenType fonts can have more than 65,000 glyphs. This means that a user does not need to have separate fonts for Western, Central European, Baltic, Cyrillic or Greek languages, but could have one single file which supports all these encodings.

OpenType fonts work in all applications, however only some applications take advantage of the advanced OpenType features. Other applications will only use the first 256 characters.

About the font

Brioni Sans is an elegant, humanist sans serif typeface suitable for both body and display text. It has been designed to complement Brioni, a serif typeface, but obviously it works well with other typefaces, or even on its own.

Sans serif fonts are not commonly used for running text, but the Brioni Sans family, with its classical proportions, subtle stroke modulation, meticulous spacing, and standard old-style figures, is highly suitable for setting books and magazines.

About the designer

Nikola Djurek was born in Croatia, studied in Croatia, Italy and finally in The Netherlands at postgraduate master course Type and Media at Royal Academy of Art in The Hague. Nikola is founder of Typonine studio for graphic and type design, teaches at University of Zagreb and Academy of art in Split.

ONE MORNING, WHEN GREGOR SAMSA woke from troubled dreams, he found himself transformed in his bed into a horrible vermin. He lay on his armour-like back, and if he lifted his head a little he could see his brown belly, slightly domed and divided by arches into stiff sections. The bedding was hardly able to cover it and seemed ready to slide off any moment. His many legs, pitifully thin compared with the size of the rest of him, waved about helplessly as he looked.

"What's happened to me?" he thought. It wasn't a dream. His room, a proper human room although a little too small, lay peacefully between its four familiar walls. A collection of textile sample slay spread out on the table — Samsa was a travelling salesman — and above it there hung a picture that he had recently cut out of an illustrated magazine and housed in a nice, gilded frame. It showed a lady fitted out with a fur hat and fur boa who sat upright, raising a heavy fur muff that covered the whole of her lower arm towards the viewer. Gregor then turned to look out of the window. Rain could be heard hitting the pane, *"about if I sleep a little bit longer"* that was something he was unable to do, as he lay on his right, and in his present state of mind he could not even hard he threw himself onto his stomach. He must have tried it a hundred times. He wouldn't have to look at the picture in the gilded frame if he began to feel a mild, dull pain in his right shoulder blade. He must have tried it a hundred times. He wouldn't have to look at the picture in the gilded frame if he began to feel a mild, dull pain in his right shoulder blade.

"Oh, God!" he thought, "*What's happened to me?" Travelling day in and day out. I never have time for myself. I'm always on the move, always worried about doing your own business, always worried about making contacts with different people all the time. I never have time to relax or become friendly with them.* He lay on his back; pushed himself slowly onto his stomach, so that he could lift his head better. His back was covered with lots of little blisters, and when he tried to turn over, he quickly got back because as soon as he did, he shuddered.

He slid back into his former position, and again he thought, *"it makes you stupid. Travelling salesmen live a life of luxury, but they never have time for themselves."*

ONE MORNING, WHEN GREGOR SAMSAsa woke from troubled dreams, he found himself transformed in his bed into a horrible vermin. He lay on his armour-like back, and if he lifted his head a little he could see his brown belly, slightly domed and divided by arches into stiff sections. The bedding was hardly able to cover it and seemed ready to slide off any moment. His many legs, pitifully thin compared with the size of the rest of him, waved about helplessly as he looked.

Overview of supported OpenType layout features

izab?! (doh-ehg) ► izAB?! (DOH-EHG)

izI Case Sensitive forms (CASE)
When function ‘change to caps’ is applied from within an application (not when text is typed in caps) appropriate case-sensitive forms are automatically applied. Regular brackets, parenthesis, dashes and hyphens are replaced with their capital forms.

Small Caps ► SMALL CAPS

fig.1

All Small Caps ► ALL SMALL CAPS

fig.2

aA Small Capitals & All Small Caps (SMCP & C25C)
In Adobe applications there are two methods of applying small capitals. The first one, Small Caps (◊⌘H) fig. 1 replaces only lower case letters with small caps. The second method, All Small Caps, fig. 2 replaces also capital letters with small capitals, and replaces regular quotation marks, exclamation points and question marks, slashes and asterisk with lowered small caps variations.

012345 ► 012345

00 Slashed Zero (ZERO)

012345 ► 012345

Because in some circumstances ‘0’, can be mistaken for an ‘O’, alternative forms of ‘slashed zero’ are available for all styles of figures

fiflffffflfhfk ► fiflffffflfhfk

fi ► fi

ffi Standard Ligatures (LIGA)

fi ► fi

Standard ligatures are those which are designed to improve the kerning and readability of certain letter pairs. For example, when this feature is activated, typing ‘f’ and ‘i’ will automatically produce the ‘fi’ ligature. Using ligatures does not affect the spelling and hyphenation of your text in any way.

21/2 31/10 4125/5100 ► 2½ 3⅓ 4¹²⁵/₅₁₀₀

7/8 Arbitrary Fractions (FRAC)

(1) (2) (3) [4] [5] [6] ► ① ② ③ ④ ⑤ ⑥

cl' Discretionary Ligatures (DLIG)

--> -> <-- -^, ^- ► → → → ← ↑ ↓

Brioni includes handy features such as replacing hyphen and greater than/less than signs with real arrows, or automatic activation of circled numerals by enclosing them in parenthesis when the discretionary ligature feature is activated. Brackets activate alternative inverse enclosed numerals. Discretionary ligatures are off by default in Adobe applications.

x(1+1.42 × 6) = y37 ► x^(1+1.42 × 6)=y³⁷

x² Superscript / superiors (SUPS)

-----> ► ----->

Replaces all styles of figures (old style, tabular, lining) and letters with their superior alternates, which can be used for footnotes, formulas, etc. Superior characters are more legible than mathematically scaled characters, have a similar stroke weight, are spaced more generously, and better complement the rest of the text.

H2O (10,00 + \$500) ► H₂O (10,00 + \$500)

H₂ Subscript / inferiors (SINF)

-----> ► ----->

Replaces all styles of figures (old style, tabular, lining) and letters with their inferior alternates, used primarily for mathematical or chemical notation. Inferior characters are more legible than mathematically scaled characters, have a similar stroke weight, are spaced more generously, and better complement the rest of the text.

({{012-3456-789}})
 ({{012-3456-789}})
 ({{012-3456-789}})
 ({{012-3456-789}})

- 123 Tabular Lining Figures (TNUM_LNUM)
- 123 Tabular Oldstyle Figures (TNUM_ONUM)
- 123 Proportional Oldstyle Figures (PNUM_ONUM)
- 619 Proportional Lining Figures (PNUM_LNUM)
- 619 Changes figures to any selected style: Lining figures which fit better with all-capital text, old-style figures, for use in a flow of lowercase and upper case text, or tabular (fixed width) versions.

1st 2nd 3rd Mlle No1 ▶ 1st 2nd 3rd M^{lle} N^o1

- 1st Ordinals (ORDN)
- The ordinals feature replaces alphabetic glyphs (but not numerals) with their corresponding superior forms.

€ \$ ¢ £ ¥ ₧ ₪ ₣ ₧ ₩ ₪ ₪ ₪ ₪ ₪ ₪ ₪

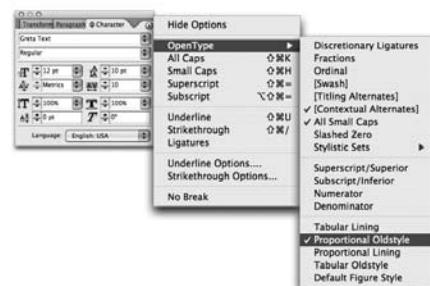

- ¥ \$ Currency (CRCY)
- Collection of various currency symbols: (U+20A0..U+20CF)

[[()]] ▶ [[()]]

- SS 01 Stylistic Sets (SS01)
- Brioni includes some alternative characters which can be activated by turning on 'stylistic sets'. They make for an easy access to open brackets and parenthesis.

SMALL CAPS
Small Caps

1234567890
1234567890

OpenType font format allows including more characters inside one single font file, so there is no need to have separate fonts for Old-style, Tabular, Lining figures, ornaments or small caps, given you are using an OpenType-savvy application such as Adobe InDesign®, Adobe Illustrator®, QuarkXPress 7, etc. Instead of selecting a different font, one only need to activate an OpenType feature which controls the desired OpenType layout feature.

For example, to access Small Caps, go to **Character** menu, and select **Small Caps**. Alternatively you can use a shortcut Command+Shift+H.

OpenType fonts can contain various styles of numerals within one font. These different types of numbers are controlled by your typesetting application (such as Adobe InDesign®, Adobe Illustrator®, QuarkXPress 7, etc). Please note that not all applications support OpenType features. The software which cannot access these advances, for example Microsoft Word® will use only display 'default' figures. If you do not specify which style of numerals you would like to use, the application will use the 'default' figures. Brioni, for example, uses proportional lining figures as default.

If you go to **Character** and then **OpenType** menu in Adobe applications, there you can change the numbers to any other desired numeral style.

Font overview

Family name	Brioni Sans Std
Designed by	Nikola Djurek
Released	September 2010
Font format	OpenType PS
Supported encodings	Latin 1 (1252), Latin 2 –Central European (1250), Turkish (1254), Baltic (1257), Superscripts & Subscripts, Number forms, Arrows, Currency symbols
Supported languages	Brioni Text Std supports following languages: Afrikaans, Basque, Bokmål, Bosnian, Breton, Catalan, Croatian, Czech, Danish, Dutch, English, Esperanto, Estonian, Faroese, Finnish, French, German, Greenlandic, Hawaiian, Hungarian, Icelandic, Indonesian, Irish Gaelic, Italian, Latvian, Lithuanian, Luxemburgish, Maltese, Norwegian, Polish, Portuguese, Rhaeto-Romanic, Romani, Romanian, Sami, Serbian (Latin), Slovak, Slovene, Sorbian, Spanish, Swahili, Swedish, Turkish and Welsh
Number of characters per style	1002
Number of fonts in family	8
Supported OpenType features	Capital Spacing (CPSP), Slashed Zero (ZERO), Denominators (DNOM), Arbitrary fractions (FRAC), Subscript/inferiors (SINF), Superscript/Superiors (SUPS), Case-Sensitive Forms (CASE), Small Capitals From Capitals (c2sc), Small Capitals (smcp), Oldstyle Figures (ONUM), Lining Figures (LNUM), Tabular Figures (TNUM), Proportional Figures (PNUM), Ordinals (ORDN), Stylistic Alternates (SALT), Stylistic Sets (ss01), Standard Ligatures (LIGA), Discretionary Ligatures (DLIG), Ornaments (ORN), Access all Alternates (AALT), Glyphs composition/decomposition (CCMP)
